

2020: GAIM TESFAMICHAEL DIGITAL UNLOCK

SECURITY NOTICE FOR ALL ERITREANS: DECEMBER 22, 2019

Haile Menegesha Okbe
Investigator for Deqebat

Deqebat Eritrawyan, Merry Christmas and Happy New Year.

The SPECTRE of Tembenian Isayas Afewerki, a world-wide spy network to spy, to control, to blackmail and to neutralize Eritrean media personnel and opposition elements of the Diaspora is publicly exposed by Investigator for Deqebat Haile Menegesha Okbe. The investigator cautioned Deqebat:

**“ Are we secure with our favourite gadgets? ”
Nope! Every cell phone of Wedebat or Gualebat:
it's open conversations, texts, images, GPS
locations . . . etc is open to Gaim Tesfamichael
as to its owner. Deqebat please be aware of
Isayas's top spymaster, Gaim Tesfamichael.**

The investigator of Deqebat, has unveiled today SECURITY NOTICE to all Eritreans of Diaspora, especially to broadcasting personnel, website owners, bloggers, Facebook anchors, Youtube uploaders, Paltalk moderators, opposition activists, leaders and cadres of Wedebat and other elements to safeguard their secrets as Gaim Tesfamichael, SPECTRE's chief under Isayas is clandestinely swooping down on all your stored or processed digital secrets of your cellphones.

“Deqebat”, the investigator warned Eritreans, “Never believe that you're protected by hi-tech encryptions, government laws or Norton alike. Bottom line: Digital Lock is deciphered by another Digital Unlock.”

In today's world there are plenty of softwares and companies who would hack even the toughest security of cellphones for money. There are softwares, which can be secretly installed in cellphones without the knowledge of the cellphone owner, and record conversations, copy texts and images, point movements with the aid of GPS and secretly transmit the data to a remote clandestine party. Isayas's SPECTRE heavily invests on professional spy softwares.

Investigator for Deqebat, Haile Menegsha Okbe briefs his own disciplines and guidelines, during the years of spying and counter spying interactions with the SPECTRE of Isayas in Toronto, Canada, which helped to protect himself, his asset GENBNARTORONTO.com and his family from becoming prey to the predator:

1. Never believe you are 100% secure in digital world.
2. Confer ahead with your wife regarding the dangers of the Shadow, as you must anticipate, your spouse would be the next victim of the SPECTRE.
3. Declare all your cellphones, computers, laptops and emails as “PUBLIC” meaning open to anybody including to the Shadow hence you should be aware not store in any of the “PUBLIC” devices any sensitive materials.
4. Do not block the SPECTRE entirely from spying you, even if you are able to do it. To some degrees allow the SPECTRE to spy on you but never make him win in getting score or sensitive materials. That way, tire out the Shadow to exhaustion without any benefits to it.
5. Never kill the thrill of spying. Never catapult “ወደ ሽርሙግ!”, “son of a gun!”, “F***” word or any obscene pebbles against the Shadow. Always reveal good manner and attitude toward the Shadow and show to it good communication skills when is necessary to communicate with it. Always be calm, cool and professional player.

6. The SPECTRE is to go away, only after Isayas is 6 feet below the ground. Virtually, we Eritreans would never be free as long as he is alive and free. It's important to recognize this vital factor and make ourselves ready, perhaps for extended time.

SPECTRE is 007 word taken from James Bond's "From Russia with Love". It's abbreviation stands for **SPECIAL EXECUTIVE for CRIME, TERROR, REVENGE and EXTORTION.**

This document is free from negative painting or word against PFDJ (HGDEF) as the author believes there is no PFDJ (HGDEF) in Eritrea but the one and only Isayas Afewerki. PFDJ (HGDEF) like the country, people and its army is the victim of the barbaric Isayas Afewerki.

This document is free from negative word of "Sh****" against EPLF or the ex-combatants of EPLF.
